

Duna Collegium

New Leadership and Transformative Action for Sacred Sustainabiility...

WHAT???

I have been relentlessly intending the setting up of a **complex tranformative learning space** in Hungary, so that it may bring **InKNOWvations**: new and transformative learning opportunities in the growing field of

- Social Entrepreneurship,
- New science and tranformativeeco- and spiritual psychology
- New Leadership and New Governance.

My desire is to make it accessible in our region: **The Duna region** in a way that we also focus on relevance and deep traditions of the great diversity here. This is what Duna Collegium wants to offer in Central- and Eastern Europe

In my mind it has three major fractals of independent, yet interwoven learning modules of New Paradigm Learning of New Science and Inner Transformation (psychology and spirituality and science and The Tradition):

Duna Collegium (patron is **Ervin Laszlo**)

- I. Action Learning based Social Entrepreneurship partnering with Knowmads School and Greenhouse- Duna region
- II. Ancient Futures DunaSpirit in Partnership insired by Old Europe

Caring Economy (R.Eisler) and Rural Awareness of Ancient Futures (Helena Norberg-Hodge-The Economy of Happiness)

III. Transformative Learning - Society as a A Living System: Strategy, Collective Intelligence, Systems Thinking and Sustainability with partners some already under negotiation:

Schumacher College -- a LLL for all--shorter courses, Balaton Group,

"MSLS" of Blekinge College, with a focus on SoL 5 disciplines, The Natural Step, and Blue Economy (G.Pauli), also Presencing Institute, Temenos, Taos

Why?

Duna Collegium - as a symbol of Old Europe rooted in our pre-IndoEuropean times in the ancient past (see. **M. Gimbutas' work**) for millenia. Nowdays we need a non-political, non denominational learning space where young and elder people can learn and co-create so that we generate inner-consciousness space for new knowledge and values and outer space for committed action to emerge both for citizenship and leadership.

We do intend to regenerate the days of peaceful, thriving and innovative economy, social balance and equilibrium, sacred respect for the feminine and masculine in true understanding and complementarity for a sutainable region that may well contribute to the balancing need of both Europe and farther away.

WHY NOW???

It seems the time has come. We cannot postpone responsible action. There is more than just talk and talk – complexity and diversity, The Shist and Turning Point all requires new knowledge *and* resilience, awareness *and* capacity.

The recent study of Hungarystudy 2013 and the Environmental Consciousness study to show that people of this awareness actually do not contribute to the shrinking of eco footprint---all that cries for a decisive step to be taken. There are partners and leaders who seem to have the interest and rediness and capacity to stand behind this dream and intention with some more concrete managerial skills.

I am ready. Are you?

"Én dolgozni akarok. Elegendő harc, hogy a multat be kell vallani. A Dunának, mely mult, jelen s jövendő, egymást ölelik lágy hullámai. A harcot, amelyet őseink vivtak, békévé oldja az emlékezés s rendezni végre közös dolgainkat, ez a mi munkánk; és nem is kevés. 1936. jún. József Attila, A Dunánál
